PROFILE

Python Developer and Full Stack Engineer with hands-on experience in building web applications, REST APIs, AI-powered systems, and production-grade multi-agent AI platforms. Built CareerOS — an end-to-end AI-native career intelligence platform featuring LangGraph multi-agent orchestration, RAG pipelines, vector search (Qdrant), MCP-based voice automation (ElevenLabs + Twilio), LangSmith observability, and governance layers. Experienced in Python, Flask, Node.js, PostgreSQL, Redis, and AWS. Passionate about solving real-world problems through scalable software and continuously learning emerging technologies. Open to relocation and immediate opportunities.

EDUCATION

- Master of Computer Applications, Bishop Heber College, Trichy - 2024 to 2026 - 78%
- B.Sc. Computer Science, Jamal Mohamed College, Trichy - 2021 to 2024 - 73%
- Higher Secondary Education, Nest Matric. Hr. Sec. School, Trichy - 2019 to 2021 - 81%
- State Secondary Certificate, Nest Matric. Hr. Sec. School, Trichy - 2019 - 73%

SKILLS

Languages: Python, JavaScript, SQL, C++

Python Technologies : Flask, Fastapi, REST

APIs Backend: Node.js, Express.js

Databases: MongoDB, MySQL, PostgreSQL, Redis, Qdrant (Vector DB)

Frontend: React, HTML, CSS, Bootstrap, Figma

Cloud & Hosting: AWS (S3, CloudFront, Route 53, Certificate Manager), Render, VPS

Tools: Git, GitHub, Postman, VS Code, Cursor & Antigravity IDE, Command-code CLI Agent

AI Tools & Agent Workflows : MCP Servers, Make.com, Lovable, Replit, ElevenLabs, Twilio, LangGraph, LangChain, LangSmith, Qdrant, Make.com

Machine Learning: Scikit-Learn, Pandas, NumPy, Data Cleaning, Feature Engineering, Feature Selection, Regression Models, Model Evaluation.

PROJECTS

CareerOS – AI-Native Career Intelligence Platform (Production Ready)

Tech Stack: Python, FastAPI, PostgreSQL, Redis, Qdrant, LangGraph, LangChain, LangSmith, ElevenLabs, Twilio, MCP Servers, Docker

- Built an AI-powered career intelligence platform using multi-agent orchestration and Retrieval-Augmented Generation (RAG) architecture.
- Designed LangGraph multi-agent orchestration with Opportunity Agent, Interview Agent, and CareerOS Graph executing end-to-end workflows.
- Implemented RAG pipeline with Qdrant vector embeddings for semantic job matching and resume analysis.
- Integrated MCP Router with ElevenLabs voice synthesis and Twilio for AI-driven candidate outreach automation.
- Built governance and explainability layers with LangSmith observability for full trace monitoring and decision transparency.
- Designed scalable backend services using FastAPI, PostgreSQL, Redis, Docker, and asynchronous task processing.

Speech Recognition Software for Children with Cerebral Palsy

[Approved GRANT of 19.5 Lakhs from AICTE under Research Promotion Scheme to MCA - BHC]

Tech Stack: Python, Wav2Vec2, Embedded Hardware (Radxa 3W).

- Developed speech-recognition prototype for assistive communication.
- Fine-tuned deep learning models on Cerebral Palsy speech dataset.
- Improved speech understanding for assistive communication applications.
- Integrated tactile sensor and embedded hardware for real-time voice interaction.
- Contributed to a research project awarded ₹19.5 Lakhs AICTE funding

Bootfete2k26 – Symposium Management System (Deployed)

Tech Stack: React, PostgreSQL, Redis, Web Socket, ResendApi – dashboard.bootfete2k26.tech

- Built a dynamic symposium management platform using Neon PostgreSQL, Redis, and WebSockets with event-wise credentials, proctored online tests, and real-time updates.
- Designed an admin panel for event control, auto-elimination rules, leaderboard generation, final round selection, and automated email notifications.
- Used by live symposium participants for event coordination and testing workflows.
- Gained knowledge about deploying separate applications in multiple subdomains.

Retrieval-Augmented Generation Pipeline (n8n)

Tech Stack: n8n, OpenAI API, Vector Embeddings.

- Built a Retrieval-Augmented Generation (RAG) pipeline using n8n workflows
- Implemented document ingestion, embedding storage, and semantic retrieval
- Designed automated AI response generation using contextual knowledge sources.

SR Builders - Portfolio Website (Client Project - Trichy)

Tech Stack: HTML, CSS, JavaScript - srbuilderanddevelopers.in

- Developed a responsive portfolio site for a construction company.
- Integrated Google Maps and an enquiry form for lead capture.

Static Website Hosting (AWS)

Tech Stack: AWS S3, CloudFront, Route 53, Certificate Manager, HTML, CSS, JavaScript

- Hosted a secure static website with global content delivery via CloudFront.
- Implemented secure static website deployment using AWS S3, CloudFront, Route 53, and SSL certificates.

AI Calling Agent Automation (MCP Project)

Tech Stack: ElevenLabs, Twilio API, MCP Servers, Cursor IDE, Pipedream

- Built an AI calling workflow for automated voice synthesis to update latest Tech Updates.
- Gained deep understanding about Model Context Protocol to trigger multiple tools.

Machine Learning (Ongoing learning & Projects)

- Working on end-to-end machine learning workflows involving data cleaning, feature engineering, feature selection, model training, and evaluation.
- Implemented and compared Linear Regression, Polynomial Regression, Ridge Regression, Lasso Regression, and ElasticNet models using Scikit-Learn.
- Learning model performance optimization through regularization techniques and hyperparameter tuning.

INTERNSHIP

App Angadi - Full Stack Developer Intern [Nov'25 – Till Date]

- Developing enterprise case-tracking platform.
- Building backend APIs and database integrations.
- Participating in application architecture and deployment workflows.
- Collaborating with development teams on production features.

SOFT SKILLS

- Leadership & Mentorship – Department President (MCA); Guided juniors in Programming Fundamentals.
- Problem-Solving – Strong analytical skills with focus on efficient solutions.
- Communication & Collaboration – Effective in coordinating with teams and peers.
